

Please do not allow the lobbyists to keep XM from broadcasting weather, traffic news, etc. My husband is a tractor trailer driver. As such, he travels around to many different places around the country and he often cannot get local channels to tune into because of poor signals. He uses the XM radio's weather and traffic to help him know what kind of conditions he's going to be going into and it's very effective and helpful to him.

I don't believe that weather and traffic are "owned" by mainstream media, and since they cannot broadcast with the effectiveness of XM, things should be left as they are.

Thank you for your time!
